
INSTALLATION GUIDE

Setting up your new SelectConnect Bridge is easy! Simply follow the steps listed below:

Please be aware the setup process is slightly different between iOS and Android systems.

How to Set Up the SelectConnect Bridge

- 1) Locate and scan the QR code on the side of the SelectConnect Bridge box to download the Bond Home app.
- 2) Create an account and you will be brought to the app dashboard.
- 3) Unbox the SelectConnect Bridge and connect it to a working outlet using the power adapter and micro USB cord provided.
- 4) The circle in the center of the Bridge should blink green to indicate setup mode.
- 5) Tap the plus sign icon in the upper right-hand corner (iOS) or the center bottom of the screen (Android).
- 6) On the Add a New Device screen, tap Bond Bridge.
- 7) Tap “Continue” to confirm the Bridge is flashing green.
- 8) The next few steps involving accessibility permissions will differ between iOS and Android. Make sure you remain close in proximity to the Bridge.

iOS:

- A. Tap “Open Settings”.
- B. Open the Wi-Fi Settings in your phone. Tap the Bond Config network with the serial number that matches the one on the bottom of your Bridge.
- C. Go back to the Bond Home app.
- D. The app will automatically detect this connection and move to the next screen.

Android:

- A. Tap “Allow” to location permissions when prompted.
- B. The app will begin scanning for nearby devices. After a few seconds, you should see the serial number on the bottom of the Bridge. Tap that to connect to the Bridge Wi-Fi Network.
- C. A pop-up will appear showing the app is connecting to the Bridge. Tap “Connect” if it does not automatically do so.

These steps are the same for both iOS and Android:

- 1) You may be prompted to input the PIN located on the bottom of the Bridge. Enter the code and tap “OK”.
- 2) Customize the name and location of the Bridge. Tap “Continue”.
- 3) To connect to the WiFi Network, tap the appropriate network name when it appears, enter your network password, and tap “OK”.
- 4) The app will begin syncing with the Bridge.
- 5) Tap “Done” when prompted.

How To Connect a Motorized Product to the SelectConnect Bridge:

Important Note: The product pairing process is very time sensitive. Many steps allow 60 seconds or less to complete the step and move on to the next. If the pairing step is unsuccessful, please go back to the beginning (Step 2 listed below) and try to complete the process faster.

- 1) Make sure the motorized product has been set up using the product’s remote control prior to pairing the product to the SelectConnect Bridge.
- 2) Locate the unique QR code for the product type you are trying to connect. The QR code can be found in your order confirmation email and on the paper that arrived with the Bridge.
- 3) On the Bond Home app dashboard screen, tap the plus sign icon either in the upper right-hand corner (iOS) or the lower center of the screen (Android).
- 4) Tap the blue button in the lower right corner of the screen that says “Scan QR Code”.
- 5) Scan the unique QR code.
- 6) Tap the Bridge you would like to connect the motorized product to.
- 7) Customize the location, name, and icon for the product.

- 8) The next few screens will ask you to perform a series of actions to connect the motorized product to the Bridge.
- 9) Tap the “Open”, “Close”, and “Stop/Hold” functions one at a time to ensure the Bridge is communicating correctly with the motorized product. Be aware you do not need to wait for the product to fully close or open, this is just to ensure the product responds to the commands correctly. Tap “Done”.
*Please note that Favorite Limits or halfway stopping points are not currently an available feature of the SelectConnect Bridge.
- 10) The next screen will say Successfully Configured. If you need to add another product of the same type, tap “Add another like this”. Otherwise, tap “Done” to go back to the app dashboard.

*Some motorization systems will ask you to complete a series of steps between steps 9 and 10 listed above to “set up your slider”. You may either tap “skip” in the upper right-hand corner of the screen or follow the instructions in the app to set up this feature.

To Remove a Motorized Product from the Bond Home App:

- 1) On the app dashboard screen, tap the product name you want to remove.
- 2) On the shade control screen, tap the 3 dots in the upper right corner of the screen.
- 3) Tap “Device settings”.
- 4) Tap the 3 dots in the upper right corner.
- 5) Tap “Remove Device”.
- 6) Tap “Remove”.

Using The SelectConnect Bridge to Control Your Motorized Products:

- 1) Control each product by tapping on the product name from the “My Devices” dashboard screen, then tap the function you want the shade to perform.

To Schedule Automated Movement:

- 1) On the app dashboard screen, tap the product name you want to create a schedule for.
- 2) Tap the calendar icon in the upper right-hand corner of the individual product control screen.

- 3) Tap “Add schedule” or the plus sign icon if you have already added a schedule previously.
- 4) Customize the time you want the action to happen, what action you want the product to perform, and if you want the automation to just happen once or repeat on specific days of the week.
- 5) Tap “Save”.

To Group Products Together for Group Movement:

- 1) On the app dashboard, tap the “Groups” button or 3 circle icon in the lower left area of the screen.
- 2) Tap the plus sign either in the top right corner (iOS) or the bottom center of the screen (Android).
- 3) Tap the “Shade & Awning” Group type. Tap “Continue”.
- 4) Tap the product names you want to add to the group. Tap “Continue”.
- 5) Customize the name of your Group. Tap “Continue”.
- 6) Tap “Done”.
- 7) On the Groups dashboard screen, tap the movement control functions under the Group name to control all products in that group simultaneously.
*Please be aware products may not operate at the same speed; this is considered normal.

To Create Scheduled Automated Movement for Groups:

- 1) On the app dashboard, tap the “Groups” button or 3 circle icon in the lower left area of the screen.
- 2) Tap the calendar icon in the upper right corner of the Group you want to automate.
- 3) Tap “Add schedule” or the plus sign if you have already added a schedule previously.
- 4) Customize the time you want the action to happen, what action you want the product to perform, and if you want the automation to just happen once or repeat on specific days of the week.
- 5) Tap “Save”.

To Connect the SelectConnect Bridge to Home Automation:

- 1) On the app dashboard, tap the “Settings” button or gear icon in the lower right area of the screen.
- 2) Tap “Manage Integrations”.
- 3) Tap the option that corresponds to the smart home system you are looking to connect to (Alexa, Google Assistant, or SmartThings).
- 4) You will then be taken to that system’s app and guided through the process to enable the SelectConnect Bridge to communicate with your smart home device.
* The SelectConnect Bridge is not compatible with Apple Homekit.

To Connect an Individual Motorized Product to Siri Shortcuts:

- 1) On the app dashboard screen, tap the product name you want to create a Siri Shortcut for.
- 2) Tap the toggle icon in the uppermost right corner of the screen. This will bring you to the Device Settings screen.
- 3) Scroll down and tap “Advanced Settings”.
- 4) Scroll down and tap “Add to Siri”.
- 5) Tap the command you want to add to Siri (Open, Close, or Stop/Hold).
- 6) The Siri command phrase will automatically be set to “Hey Siri, Send (command) to (shade name). You may change this by tapping “Change Voice Phrase”. You will then record the alternative phrase to use with Siri for this shade command.
- 7) Tap “Done”.
- 8) Repeat for any further commands you would like to set up with Siri Shortcuts.
*Siri Shortcuts will only function on an individual shade basis. There is no ability to use Siri Shortcuts to control Groups.
