RISKS & WARNINGS

Please handle with care when you open the package and during assembly and installation. The frame parts are made of metal and parts may have sharp corners. Please keep children away during assembly and installation of awning.

Caution improper installation of mounting brackets can cause damage or personal injury. The bracket bolts must be secured to a stud. The brackets should be secured with lag screws as close to the center of the stud. When fully extended the weight of the awning exerts significant torque on the torsion bars. Failure to center bolts to studs will cause premature failure and result collapse and injury. Do not leave the awning extended during extreme weather conditions such as high winds, rain snow and ice. The extreme weather conditions may cause the arms to break and can cause injury or property damage. Awntech does not take responsibility for any weather related or improper handling of awning.

Never attempt to repair or disassemble the arms. The arms support your awning is manufactured with structural grade stainless steel cables and high tension arm springs located inside the arms. Serious injury or property damage can occur if attempting to install without restraining. If you have any questions, please contact us at 800-203-7049.
